PREPERATION FOR OB ULTRASOUND

1. Empty your bladder 90 minutes before the exam.
2. Drink 2 glasses (8 oz. each) of fluid (water, soft drink, milk, coffee, etc.) 60 minutes before your exam.

NOTE: A full bladder is helpful for certain parts of the exam. Your bladder does not have to be so full that it is painful. If your bladder is too full, relieve yourself until you feel more comfortable.

Things to note:

- All patients may eat meals
- Please limit the number of additional people to 2 and have someone with you to supervise children under 5. The ultrasound is a medical test and requires the sonographers full attention.

For OB ultrasounds you will receive approximately 2-3 pictures.

Women First OB/GYN Center will directly bill your insurance company for the medical component of your ultrasound scan that is ordered by your doctor.

- **Ultrasound will start at the scheduled time regardless if the whole party is present.**
- **There is NO videotaping allowed during the exam**
- **If you arrive more than 5 minutes late for your appointment, you will be rescheduled.**
